

EMBEZZLEMENT IN THE DENTAL OFFICE – *It could happen to you!*

It is estimated that over 80% of dentists will be embezzled in their career at least once.

Don't let your practice be part of those statistics. **No one** is immune to embezzlement. Be aware and protect your practice from this danger. **Gain a thorough education on the causes and effects of embezzlement.** Sandy provides safeguards so you can prevent, detect, and respond to suspicions of criminal behavior within your practice.

PARTICIPANTS WILL LEARN:

- Define the difference between embezzlement, fraud and stealing
- Learn why it happens so frequently in dental practices
- Analyze the profile of the typical dental embezzler
- Recognize who is most likely to embezzle
- Understand how embezzlement happens and how it is detected
- Discover methods for detecting and preventing embezzlement
- Identify preventive measures that can be immediately implemented
- Realize techniques for responding to suspicions

Presentation Length:

Up to half day

Suggested Audience:

Due to the sensitive nature of topics discussed, this presentation is geared to Dentists and Practice Owners only
